Experience

Frontend Developer Internship

May 2023 - Present

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

Freelance Frontend Developer

Nov 2022 - Present

Self Employed

- Delivered professional websites using HTML5, CSS3 (BEM), JavaScript and React best practices
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world

Projects

My E-Portfolio | [Website](#)

- A Single Page Application developed to display information about myself and to showcase my projects.
- Built using **JavaScript ES6+**, **HTML** and **CSS**

E-Commerce Library Application | [Website](#) | [GitHub](#)
